[Reopening a Medical Practice: Pediatrics](#)

MAY 19, 2020 | 12:15PM - 1:15PM

As physicians begin to reopen their offices, pediatric practices face a unique set of challenges. Children and their parents may be concerned about coming into the doctor's office, but many services for children cannot be provided via telehealth. At the same time, delayed or deferred care for children can cause more severe problems later in life. This webinar will provide best practices for pediatric practices to keep your patients and staff safe and healthy. Joining CMA for this event will be Rene Bravo, M.D., a pediatrician from the Central Coast. Dr. Bravo will discuss how he has kept his practice open during the pandemic.
