SAVE THE DATE - JUNE WEBINAR

Fundamentals of ACE Screening & Response in Pediatrics

Wednesday, June 24, 2020

Noon – 1 p.m.

[Register for the Webinar](#)

California Surgeon General, Dr. Nadine Burke Harris, will lead a multidisciplinary case-based panel on ACE screening and response in pediatrics.

Panelists:

- Dr. Nadine Burke Harris, California Surgeon General
- Dr. Lisa Gutierrez Wang, Director of Children’s Behavioral Health, Santa Cruz County
- Dr. Eva Ihle, Associate Clinical Professor of Psychiatry, UCSF Weill Institute for Neurosciences
- Simone Ippoliti, Pediatric Nurse Practitioner and Site Director, Bayview Child Health Center

Panelists will discuss the components of how to screen pediatric patients for Adverse Childhood Experiences (ACEs) and take a multidisciplinary approach to developing comprehensive treatment plans. With distinct clinical viewpoints and a case-based format, this webinar will cover:

- A walk-through of workflow, algorithm, and ACE-Associated Health Conditions.
- Best practices on administering screening and incorporating multidisciplinary care.
- What screening looks like in clinical practice, with three case studies.

REGISTER HERE

Don't forget, to continue receiving Medi-Cal payment for ACE screenings after July 1, you must take the [online training](#) and [fill out an attestation form](#).

This is the fifth in a series of monthly educational webinars that offer practical information for primary care and behavioral health providers on understanding toxic stress and providing trauma-informed care.

Information about the webinar series and recordings can be found on the ACEs Aware Educational Events [webpage](#). For the latest information, follow us on [Twitter](#), [Facebook](#), [Instagram](#), and [LinkedIn](#).

About ACEs Aware

The Office of the California Surgeon General and the state Department of Health Care Services are leading a first-in-the-nation statewide effort to screen children and adults for Adverse Childhood Experiences (ACEs) in primary care, and to treat the impacts of toxic stress with trauma-informed care. The ACEs Aware initiative is built on the consensus of scientific evidence demonstrating that early detection and evidence-based intervention improves outcomes. The bold goal of this initiative is to reduce ACEs and toxic stress by half in one generation, and to launch a national movement to ensure everyone is ACEs Aware. For more information, visit www.ACEsAware.org.
